

NTS Global Engineering Services (GES) signs strategic long term partnership with University of Hassan Premier Settat (UH1)

Rabat, Morocco, November 7, 2018

NTS Global Engineering Services (GES) and University of Hassan Premier Settat (UH1) renewed its strategic partnership which will offer an opportunity to work together on more comprehensive research engineering projects.

This mutually beneficial private industry and academia collaboration will contribute to ground breaking engineering research and innovation contributing to development of Moroccan industrial aerospace and automotive ecosystems.

“We are very excited to continue our work with UH1, one of the leading engineering Universities in Morocco. Our team at NTS Maghreb consists of young and dynamic team of skillful engineers, recent graduates from various universities. This partnership provides the platform for students to conduct their research work, tackle some of the most interesting topics in engineering fields and get prepared for a future competitive professional working environment”, says Mr. Mohamed Serraji, President & CEO, NTS Global Engineering Services.

“Our experience shows that one of the most important strategies in forging successful partnerships is to develop an entrepreneurial mindset by interacting closely with local business community. Doing so we can produce graduates who are ready for exciting careers in engineering, with problem solution mindset and active professional network”, added Mr. Ahmed Nejmeddine, President of UH1 Settat.

About NTS Global Engineering Services:

NTS GES is an engineering service provider for the aerospace, defence, automotive, and railway industries. The company is supporting major OEM’s manufacturers in the design, implementation and industrialization of their products by offering its expertise in number of areas. Over the years, the company has acquired credibility, developed an active presence in multiple sectors and enjoyed recognition both in Canada and internationally. The company is headquartered in Canada with affiliate offices in Morocco, France and UK. NTS GES is AS9100 rev. D certified and is preferred supplier to number of international OEMs.

About Hassan Premier Settat (UH1):

The university Hassan Premier-Settat has been established in 1998. More than 20,000 students study a diversity of disciplines including engineering, applied sciences, law, commerce, social sciences, and health education. The University participates in number of programs and it has established partnerships at the regional, national and international levels. Currently the University is launching its new program of Research and Innovation which provides platform for new projects and collaborations.
